

TWELFTH IPA ADRION MONITORING COMMITTEE MEETING SUMMARY

The twelfth meeting of the IPA ADRION Monitoring Committee was held in Ljubljana (Slovenia) on 12-13 November.

The Monitoring Committee was informed about the state of play of the programme implementation; in particular, the three strategic projects supporting the implementation of EUSAIR were invited to present their state of play.

The meeting was also an opportunity for the JS to illustrate potential synergies between approved projects and EUSAIR Actions and Flagships.

Regarding the allocation of resources to projects, the Monitoring Committee approved the application package for the second call for strategic projects (SO 1.2) and continued the discussion on the design of the second restricted call for proposals.

As far as the implementation of the programme is concerned, the Monitoring Committee approved the communication strategy and decided to set up an Evaluation Working Group to design the content of the future independent evaluation of the programme. The Evaluation Working Group would be responsible for reporting its activities to the Monitoring Committee for final decisions.
